

DCE Technology

Digital Transformation Begins Here..

Introducing DCE Technology

DCE Technology, established in 2019 and headquartered in Virudhunagar, Tamilnadu, is a dynamic IT services and consulting company dedicated to delivering innovative digital solutions. We specialize in custom software development, cloud services, business consulting, and corporate training, helping businesses and institutions embrace digital transformation effectively.

Unified Workspace

Consolidate project management, resource planning, and communication into a single source of truth.

Proactive Risk Engineering

We deploy custom-built AI algorithms that map operational friction points, allowing enterprises to anticipate delivery risks and project margins.

Enterprise Interoperarbility

We specialize in custom core integration, engineering direct data pipelines across complex legacy and modern enterprise systems.

Our Tech Stack

Frontend & UX

React | Laravel | Next.js | TailwindCSS | Flutter

High-performance, responsive interfaces.

Backend & Data

Node.js | Go | PostgreSQL | Python | Springboot | MySQL

Distributed, low-latency architecture.

UX & 2D Animation

Figma | Illustrator | Adobe Animate | Adobe Character | SynFig

Quality Design and Animations.

Infrastructure

AWS | Docker | Kubernetes | Azure | GitHub Actions

Automated scaling and CI/CD pipelines.

The Value Proposition: Why DCE?

We don't just provide software; we provide a competitive advantage.

Accelerated Delivery

Streamline your operations and bring products to market faster than ever before.

35% Average Lifecycle Reduction

Enhanced Accuracy

Eliminate manual entry errors with automated data synchronization across all platforms.

99.9% Data Integrity

Empowered Teams

Free up your best talent to focus on high-impact innovation rather than routine administration.

Innovation Time

Client Portfolio & Market Traction

40+	7	95%	70+
ENTERPRISE CLIENTS	COUNTRIES ACTIVE	CUSTOMER RETENTION	APPLICATIONS

Featured Projects & Implementations

Large Scale Modernization

Architecting unified native applications to decommission complex, fragmented legacy tech stacks.

ENGINEERING SCOPE
Deploying custom-engineered data mapping engines to automate over 90% of complex pipeline migrations with zero downtime.

Next Gen Autonomous Operations

Engineering proprietary, context-aware AI agents designed to seamlessly handle high-volume administrative decision-making workflows natively.

ENGINEERING SCOPE
Leveraging predictive execution modeling to compress operational latency by up to 65% across core business applications.

Global Resource Planner

Building ultra-scalable, real-time application architectures optimized for massive concurrent user bases operating across distributed global environments.

ENGINEERING SCOPE
Engineering custom layers to maintain sub-second database consistency across multi-region distributed infrastructures.

The Team: Visionaries & Engineers

Vijayavel P

CEO

Secures investor backing, safeguards the company's bottom line, and builds a high-governance, high-performance team culture.

Function / Stack	Core Technologies	Resource Count	Key Leadership
Frontend & Cross-Platform	React JS, Next JS, Flutter, React Native	21 Developers	Veeramani, Malarpriya, Vignesh
Backend Engineering	Python, Spring Boot, Node.js, Laravel	19 Developers	Akshaya, Prabavathy, Sathiyamoorthi
UI/UX Design	Figma / Product Design	3 Designers	Nazeer
Quality Assurance (QA)	Manual & Automation Testing	4 Testers	Divya, Nisha, Saranya, Priyaah
Agile Governance	Scrum Methodology	1 Scrum Master	Smaila

Commercial Momentum & Scalability

Leveraging structural engineering investments to drive a projected revenue

Financial Year	Revenue	Key Operational Milestone
FY 2023-24	₹20,45,000	Core Architecture Build & Initial Product Launch
FY 2024-25	₹47,29,500	Scaled Custom Application Delivery for Enterprise Clients
FY 2025-26 (Current)	₹30,60,000	Standardized Project Governance & Expanded Tech Team to 35+
